Description:

TPPBL is a coated, matt and tearproofed polypropylene film.

This film is provided with a water proofed coating. Special features of the prints are high brilliance with regard to the colours and image definition.

The medium is qualified for indoor- and outdoor-application and can be eyed easily.

If an eyed banner is required, it is necessary to keep a distance of less than 30 cm. Further more it is advisable to underlay the eye with textured banner.

You can use TPPBL as a scaffold banner, a banner for clamping fixtures and as a construction-display.

EMBLEM TPPBL has been developed and conceived for BubbleJet and the Piezo-technology with pigmented, dye based and oil-bound ink.

To avoid fingerprints it is advisable to wear cotton gloves.
