

# Matt Laminate

## Technical Data Sheet

---

### Product Description

- 80mic PVC product costed on one side with a clear solvent, acrylic adhesive
- This product has added UV inhibitors
- It is for a pressure sensitive application

### Release Liner

- The adhesive is protected with a white paper release liner that is easy to remove
- The release liner is 80gsm

### Application Temperature (guide only)

- 5°C - 50°C

### End Use Temperature (guide only)

- -30°C - +70°C

### Shelf Life

- 2 years when stored at 15°C - 25°C

### Durability

- This product will give excellent performance with outdoor exposure for up to 1 year if applying to a water based print and 2 years with a solvent print
- The durability only relates to the film and not to the colours of the print
- Applying the product inside will increase the durability values of the film

### Recommendations

- It is always recommended to edge-seal prints to give added protection when using outdoors. This will increase the performance of durability for the adhesive.
